

Video Transcripts for Gregory Bailey, Director, Ministry of Agriculture

0:00

My name is Gregory Bailey, Director of Agriculture, Minister of Foreign Affairs, Agriculture, Trade and Barbie Affairs.

0:05

Some persons might be fearful of using their livelihoods in terms of being farm workers etcetera, etcetera, in terms of being replaced by technology.

0:15

However, I think that the technology when implemented in a given area should also create job opportunities that counter up the loss of Centers.

0:22

For example, joint technologies though which we have introduced at the other project engine department and get extended its unit American Action News GIS coordinates will find the various boundaries and knockers and so maybe you may not lose the job on the ground for the food soldier.

0:40

However, you have somebody that is required now to manage humans, youth and women can also benefit from the fact that a lot of the activities involved engaged in primary production are very label intensive and digital transformation that will go with nature, for example, as it leads to land preparation, recognize application, use of applicant cars and cognitive farmers for years to to adopt technology.

1:08

But as I would have mentioned earlier on, there's a basic infrastructure that need to be put in facilitate such an option and we look forward to the government by that type of instruction, especially in rural areas.
