

Video Transcript for Esquire Henry, UN Youth Advisory Group

0:00

I understand digital transformation as the inclusion of technologies within our everyday life could be at home, work or even at school.

0:08

I think that it can definitely be very beneficial to us as we look at the climate friendly benefits.

0:15

You know, now we can send emails, we can conduct business online and this really saves paper.

0:21

It really saves the transportation timing would have take to deliver a letter in the past.

0:27

And it's also time friendly, time efficient.

0:29

It increase our comfortability, and it makes us more connected as we can now reach out to persons across the globe at the touch of a fingertip.

0:38

We can save on transportation costs, and you know, it really does have a lot of benefits, but all those benefits are coupled with responsibility.

0:46

We also must ensure that we try our best to ensure that there's equal access to technologies because, you know, the less fortunate do need to have some of these benefits as well.

0:57

And also that we are educating ourselves and preparing ourselves for that transformation.

1:04

Because digital, digital transformation does not really take away jobs, but it shift them into a different era.
